

whats working:

- the home page collage is working really well
- the aesthetic of the website is successful
- the page layout for cast and seasons is coming along really nicely

whats not working:

- when you click to a new page from the navigation bar it opens a whole new window

whats still going to be done:

- Gilmore Girls logo is going to take you to home page when you click on it
- images are going to be places on right side for the page layouts
- image next to text for each of the pages
- hover states for clicking on buttons as well as hovering over the images
- pictures all responsive

responsive page design:

- there will be one column for the collages pictures on the home screen

what's going to be difficult:

- mobile layout might be difficult when trying to figure out how to get certain elements to stack
